

Task: Observational experiments.

EXPERIMENT TIME.. At this point I know lots of you will not have as many materials as you would like but work with what you've got, even experiment on apps on your phones!

These experiments need to be a lot more focused than previous ones, we are nearing the end of this project now so keep final piece materials in mind.

The experiments should link to the artists you have researched, write about the link around your experiments and perhaps stick images of your artists work on the page.

If you can it may be helpful to stick photographs you are working from on this page. (They must be your own)

Use at least 2 materials to experiment with, use the examples as guidance of presentation. This can be a single or double page.
